Definitely.

Danny, can you check and see who has been charging to this Site and send me an update on current charges. I need to make sure we are not busting the TDD.

Can you forward it to me as well when you receive it.

Thanks

Danny

Gary - we have this info. Not sure if it is all going in Response Manager, but the RP's Consultant is providing us updates on what has been completed. PPM said they would be sending an updated chart tonight or in the morning. I will send them an email tonight to remind them and forward it to ya'll as soon as I get it.

The matrix will look something like:

Properties with oiled vegetation cut:

Properties with grass cut:

Properties with House/shed/fence Pressure washed:

Properties with visible oil on/in soil removed:

These are my headings, but they are close to what their using.

See table. Trying to come up with metrics to show status of cleanup. Think about it.

Subject: Lard Oil Update

- **LARD OIL SPILL, DENHAM SPRINGS, LA:** EPA continues to provide RP oversight of the Lard Oil spill cleanup activities that has impacted a residential area. The RP has been removing stained vegetation and has started scraping contaminated surface soils. The RP started air sampling activities on the facility and around the perimeter of the “impact” area of the oil release. EPA reviewed and provide comments back to the RP regarding their “Technical Sampling and Analysis Plan”. EPA received the RP’s “Draft Cleanup Plan” for EPA review/comment which includes indoor air and wipe samples of contaminated properties. Many residents have obtained legal representation which appears to have had an adverse effect on gaining property access agreements.

LARD OIL – 12:30 pm 8/29/2016	
73	Estimated Total Number of Houses within “Impact Zone”
39	Number of houses Oiled OUTSIDE
7	Number of Houses Oiled INSIDE
46	Number of Houses with Oil in YARD
36	Number of Houses with ACCESS AGREEMENTS Granted to both EPA and Lard
